

212 Brooksbank – North Vancouver, BC Hazmat Abatement & Demolition

Matcon Demolition was awarded this project in July 2010. The building structure and finishes were contaminated with lead dust. The selective demolition in the 2-storey building was conducted under lead abatement procedures, using PPE and decontamination methods.

The scope of work included:

- ◆ Asbestos abatement
- ◆ Provision of lead abatement procedures
- ◆ Tear down of a 4-storey building
- ◆ Selective demolition of a 2-storey building
- ◆ Lead dust abatement in 2-storey building
